

Please do not deregulate broadcast ownership. I do not believe it is in the best interest of the public to have what happened in Radio happen to TV. The appearance of impropriety is glaring out at the American people, to whom you have a sworn duty to look after. Big Business does not need to own our airwaves. The best protection for Americans lies in many different owners all over the place, and as is evident to many, we need more small TV stations, newspapers, and radio stations that are truly independent of the influence of these corporate giants whose first loyalties lie in PROFIT, not TRUTH. Thank You. Also it is a disgrace not to have more public debate on this issue. Why is there not more media coverage of this important change? Case in point. Scrap the 1996 Telecommunications act, worst thing to happen. Also Clear Channel is a monopoly. Are there not laws against that?
